Electronics Limited

“Tackling Crime in the Community”

Response Electronics has been working with local community Crime Reduction Partnerships for more than 10 years, providing “Simple, Effective & Low Cost” residential security solutions.

Supporting local authority projects with Wireless Intruder Alarms and Home CCTV systems, we have been working successfully to reduce crime in the community.

Whether the project is for a single system to help reduce the risk of repeat victimisation or a large scale requirement tackling a complete area, we have the ability to respond.

Supplying good quality products is only part of the story. Response also provides a complete, “tailor made” support service using local labour. We will provide:

- On Site Staff Training
- Installation & Commissioning
- Problem Solving
- Customer Demonstration & Training
- 24/7 Help Line
- Free next day delivery
- Simplified Operating Instruction
- Product Branding

“Everyone has the right to feel safe and secure in their own home”

Often projects start in a very small way, such as reducing incidents of burglary re-victimisation or the fear of crime. In Mansfield, just such an initiative was so successful the idea was recommended to the Neighbourhood Renewal Management Teams in the Division. This led to us supplying the “Safe and Secure Homes” project, which is now the UK’s largest crime reduction scheme of its type.

Additionally, it supports the objective of the Local Authority Floor Target of 25% reduction in burglary in the area.

Complete Range of Alarms and CCTV
